

FIRST RESPONDER

COURSE OUTLINE

Specifically tailored for aspiring emergency services professionals, the First Responder (FR) program will introduce the student rescuer to advanced first aid and the foundation principles of advanced patient assessment. Unlike any other layperson first aid course, in the FR program the student will learn various aspects of pre-hospital emergency care all while gaining valuable hands on experience using the equipment in a mentored environment.

Course materials include this full colour textbook featuring content organized for progressive learning, real-life scenarios, skills summary, charts and diagrams, hundreds of photographs and illustrations.

Course topics include but are not limited to:

- Emergency Scene Management
- Prevention of Disease Transmission
- Human Body Systems
- Patient Assessment
- Cardiovascular Emergencies
- Respiratory Emergencies
- Mass Casualty Incidents
- Head and Spine Trauma
- Soft Tissue Injuries
- Musculoskeletal Trauma
- Childbirth
- Crisis Intervention
